WORK EXPERIENCE

Decimal Point Analytics Pvt.Ltd

Software Development Engineer

Mar 2024 - Dec 2025

- Developed and maintained enterprise web applications using Oracle APEX, Django, FastAPI, and Python.
- Designed responsive user interfaces and implemented scalable backend solutions for business-critical applications.
- Built and customized Interactive Grids, Forms, Reports, Dashboards, and role-based access control systems in Oracle APEX.
- Developed REST API integrations and automated data-processing workflows across multiple applications.
- Worked extensively with SQL, PL/SQL, JavaScript, and Oracle Database for application development and optimization.
- Developed interactive graph analytics and visualization modules for complex business relationship analysis and large-scale datasets.
- Participated in requirement gathering, development, testing, deployment, and production support activities.

EDUCATION

Parul University

Bachelor of Technology - Computer Science Engineering - 8.19

June 2019 - April 2023

Narayana Junior College

Intermediate - MPC - 9.82

March 2019

PROJECTS

Automated Real-Time Data Scraping & Processing Pipeline(Python)

- Developed an automated pipeline to extract, clean, validate, and process real-time market data from multiple sources.
- Implemented data transformation and quality-check mechanisms for analytics readiness.
- Designed automated object-storage uploads with organized archival structures.
- Delivered a reliable data-processing system supporting downstream business applications.

Multi-Role Operational Contract Management Platform (Oracle APEX)

- Developed a comprehensive role-based contract management platform with dynamic dashboards.
- Implemented user, role, tenant, and permission management modules.
- Built notification systems, custom validations, and advanced JavaScript-based interactions.
- Designed intelligent navigation and access-control mechanisms for different user roles.

Rent Management Portal (Django)

- Developed a full-scale rent management system with role-based access control.
- Integrated OCI Object Storage for secure document management.
- Automated Excel and PDF processing workflows.
- Implemented rental calculations and operational automation features to improve business efficiency.

Dynamic Contract Intelligence Dashboard (Oracle APEX)

- Developed an end-to-end contract intelligence dashboard using Oracle APEX.
- Implemented editable Interactive Grids with multi-row operations and advanced data management features.
- Built secure document upload/download functionality and role-based access controls.
- Designed responsive dashboards providing real-time contract visibility and operational insights.

SKILLS

- **Languages:** Python, Java, Javascript, SQL, CSS
- **Frameworks:** FastAPI, Django, React.js
- **Tools & Platforms:** Oracle APEX, APEXLang, Git, MongoDB, PL/SQL, VS Code, REST APIs

CERTIFICATES

Oracle Apex Cloud Developer Professional 2025

Oracle Cloud Infrastructure Foundation Associate
